EDUCATION

Bachelor of Technology, Information Technology

IET, Dr. RML Avadh University, Ayodhya

08/2019 - 08/2023

8.0 CGPA

WORK EXPERIENCE

Software Engineer - Full Stack

Qayem Overseas Pvt Ltd [🔗](#)

11/2022 - 12/2023

Remote

Achievements/Tasks

- Built responsive frontend (**React/Next.js**) and optimized backend (**Node.js/Express.js**) for Qayem Overseas, enhancing global food supply operations
- Managed **MongoDB** and **PostgreSQL** for efficient storage of diverse agricultural product information
- **Agile** development collaboration for swift responses to dynamic market demands.
- Implemented **testing** strategies ensuring the reliability of Qayem Overseas' global food supply platform.
- Used **Node.js** to optimize backend, contributing to timely food deliveries beyond Indian borders.

Web Developer Intern

LetsgrowMore [🔗](#)

07/2022 - 08/2022

Achievements/Tasks

- Developed a data management web application with a user-friendly interface, using **HTML, CSS, and JavaScript**.
- Implemented a secure and reliable back-end system with **MySQL**, facilitating data storage and retrieval.
- Employed SQL queries to seamlessly extract and present data, enhancing the application's efficiency and effectiveness.
- Ensured seamless communication between the front-end and back-end components, creating a cohesive user experience.
- Demonstrated proficiency in full-stack web development, delivering an effective solution for data management.

PROJECTS

TalkifyDocs (12/2023 - Present) [🔗](#)

- Led creation of an exciting platform using **Next.js, Clerk Auth**, and **Open AI API** for captivating document conversion into personalized AI content.
- Seamlessly combined **AWS S3, Vercel SDK**, and **Pinecone DB** for optimal performance, incorporating vector DB Pinecone for real-time analysis and **PostgreSQL (Neon DB)** for robust data storage.

CrowdXfund (05/2023 - 08/2023) [🔗](#)

- CrowdXfund is a **blockchain-based crowdfunding** platform enabling secure, transparent, and efficient campaign launch, management, and participation for individuals and organizations.
- Platform developed with **Next.js, Hardhat, and Polygon**, ensuring unparalleled security, transparency, and efficiency in campaign launch, management, and participation.

SRMS - Student Management System

(08/2022 - 12/2022) [🔗](#)

- Created a robust student management system with **MongoDB, Express.js, React, and Node.js**, giving admins control over users and classes, and empowering teachers with attendance and performance assessment features.
- Implemented **Chart.js** and **Redux** for enhanced data visualization and state management in the MERN-stack student management system. Admins control users and classes, teachers manage attendance and performance assessment.

CERTIFICATES

Full Stack Web Development - MERN

(01/2023 - 08/2023) [🔗](#)

scored 100% in assessment (Top Performer) By iNeuron

Google Cloud Ready Facilitator (04/2022 - 06/2022) [🔗](#)

By Google Cloud

Problem Solving (Basic) Certificate (03/2023 - 04/2023)
